Subject: Microsoft Settlement

I'll make this short and sweet.

I disagree with the current form of the MS/JD settlement. I believe it amounts to nothing more than a slap on the wrist for MS and an insult to consumers. I believe Microsoft's past behavior (even under legal restraint) clearly demonstrates that they will disregard any but the strongest measures designed to modify their behavior. Consumers suffer when an unrepentant and unfair monopolist like Microsoft is allowed to continue behavior that is damaging to the marketplace and competition.

Thank you for your time.
